Committee will work in line to meet these objectives

1. To improve the employable skill set of the unemployed people through training.
2. To increase the potential of an unemployed person to set up his own workshop/small scale enterprise.
3. To impart practical exposure and knowledge to the school children.
4. To expose the school children to the usage of online learning tools and software.
5. To unite student members of the Naipunya club in the bonds of friendship, good fellowship and mutual understanding.
6. To create and foster a spirit of oneness among the student and staff members of Naipunya club.

The committee shall meet as frequently as necessary to allow it to discharge its duties and in any case at least two times per academic year.

Respected sir,

Subject: Approval for organizing a 3-day training program on casting related mechanical works for unemployed youth of nearby villages – Reg.

With reference to the telephonic conversation held with Kandlakoya, Ravalkole village Sarpanch NAIPUNYA Club is planning to organize a "3-day training program on Casting related mechanical works" for unemployed youth of nearby villages from 25-08-2018 to 27-08-2018 at CMR College of Engineering & Technology. The objective of this training is to develop the skill set on casting related mechanical works and encourage towards self employment or work position in any industry.

Resource person for this training is Mr. Kumar Sai, Assistant Professor, Mechanical Engineering, CMRCET. To organize this training program, resources of Engineering Workshop Lab are required. Materials and tools required are attached herewith.

I request you to kindly accept the proposal and provide the resources.

UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM

Date: 25-08-2018 to 27-08-2018

CONTENT

Module-I

Casting processes: Classification, Metal mould casting processes, advanced casting processes, investment casting, Recasting, mould and core making materials and their characteristics.

Module-II

Technology of Selected casting Processes: Clay bonded, synthetic resin bonded, inorganic material bonded mould and core making, sand additives, mould coating, continuous casting process, centrifugal casting process.

Module-III

Casting defects, inspection, diagnosis and rectification, mechanization and automation in foundries, use of robots, casting design, near net shape casting, pollution control, energy and waste management in foundries.

COURSE OUTCOME

1. Knowledge of casting & recasting process
2. Perform practical skills of casting using clay bonded etc.
3. Knowledge of casting defects and shaping and waste management in foundries.

Report on Skill Development Program on Casting Related Mechanical works Under

UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM

Date: 25-08-2018 to 27-08-2018

Time: 9:30 am to 4.00 pm

Venue: CMR College of Engineering & Technology

Event report:

NAIPUNYA Club has organized a unemployed youth skill development program on Casting related mechanical works to the unemployed youth of nearby five villages. The objective of this training is to focus on training the unemployed people towards increase in their chance of employment.

In these three days the trainees are explained by casting processes, Technology of Selected casting Processes, Casting defects, pollution control and waste management in foundries

At the time of visit to the lab we explained the practical parts of casting related mechanical works and the mechanisms were shown to them.

Then we showed how to work on Casting related mechanical works machines with safety precautions. They were given by designs of work to be turned and under the guidance of lab assistants the operations were conducted.

No. of Participants attended the session: 11

Venue: Engineering Workshop, CMRCET

Outcome: Perform practical skills of casting using clay bonded etc

Overall Feedback: As per discussion and feedback with the people involved in the session, the topic covered was appreciated by most of the participants and requested to arrange such hands on with advancements in the future also.

Respected sir,

Subject: Approval for organizing a “General interaction on Applications of Physics in Engineering”, on 1-9-2018 for IX class students, ZPHS, Pudur– Reg.

This is to bring to your kind notice that as per the discussion with Head Master , Pudur, Naipunya Club is planning to organize a “General interaction on Applications of Physics in Engineering” for IX class students, on 1-9-2018 at ZPHS, Pudur.

The main objective of this lecture is to enhance the skill set of the school students.

Resource persons for this training are:

1. Penumarathi Sai Raja, 16H51A0147, B.Tech, Civil II year, CMRCET.
2. Gattu Akhila, 17H55A0111, B.Tech, Civil II year, CMRCET.
3. Karrolla Jyothi, 17H55A0213, B.Tech, EEE II year, CMRCET.
4. B Bhanuprasad, 16H51A0366, B.Tech, Mech II year, CMRCET.

The objectives of the guest lecture are to make the students to:

- Identify the importance of Physics in Engineering.
- Analyze the behavior of moving objects in our daily life.
- Examine the applications of Physics in Engineering.

Kindly accept the proposal.

Respected Sir,

Sub: Willingness to organize a one day guest lecture on **"General Interaction on Applications of Physics in Engineering"** - Reg.

As per the earlier conversation we had, we are willing to conduct a One- day guest talk on **"General Interaction on Applications of Physics in Engineering"**. It is also informed to you that the students of CMRCET will be deputed for the same. It will be helpful for your students to know the theory of Physics and its applications in our daily life.

In this regard, I request you to provide an opportunity for our students and kindly provide the basic facilities to our students in conducting the session

A REPORT
Of
GUEST LECTURE ON

TITLE: "General interaction on Applications of Physics in Engineering"

"NAIPUNYA CLUB" of CMR College of Engineering & Technology has organized a "General interaction on Applications of Physics in Engineering" for IX class students at ZPHS, Pudur on 1-9-2018. The speakers of the lecture are:

1. PENUMARTHI SAI RAJA, 16H51A0147, B.TECH, CIVIL II year, CMRCET.
2. GATTU AKHILA, 17H55A0111, B.TECH, CIVIL II year, CMRCET.
3. KARROLLA JYOTHI, 17H55A0213, B.TECH, EEE II year, CMRCET.
4. B BHANUPRASAD, 16H51A0366, B.TECH, MECH II year, CMRCET.

Key Deliverables:

- Session was covered with the discussion on topics like Physics, Science, Engineering, basics of Engineering, Applications of Physics in Engineering.
- About 30 members participated in the session.
- This lecture was aimed to provide basic knowledge about Physics, knowledge of moving objects behavior, and how physics impact them, etc.
- Exposure to the day to day activities of human related to physics is given to the students.
- Feedback is taken at the end of the session from the participants.

General interaction on Applications of Physics in Engineering

Applications of Physics in Engineering

- Why do things move?
- Does everything that goes up come down?
- Why does a bicycle stay upright when its moving but falls when it stops?
- Why do we wear seatbelts?
- why doesn't the moon fall into the earth?

- Science is a part of everyday life.
- It is evident in the modern technological devices we use everyday
- In this course we will uncover the scientific principles in the everyday experiences and objects around us
- We will see that what seems like 'magical' effects can be understood with just a few basic principles → *things happen for a reason!*

- Why is it tough to walk on ice?
- Why does ice melt?
- Why doesn't the moon fall?
- What is sound?
- What is light?
- What is lightning?
- What makes rainbows?
- How can a boat made of steel float?
- Why can't we see air, how do we know that its there?

What Physics is?

- The study of how objects behave (from the very tiny to the very big, and from the beginning of the Universe to its ultimate fate).
- A search for patterns or rules of behavior of the objects in the Universe.

- Why are some turns on roads banked?
- What keeps me from falling on the Silly Silo at Adventureland?
- Why do my socks sometimes stick together in the clothes dryer?
- Why do I get a shock after I walk across the carpet room and touch something in winter?

PRINCIPAL
CMR COLLEGE OF ENGG. & TECH.
Kandlakoya (V), Medchal Road,
Hyderabad-501401.

- What's the deal with magnets? Why do they stick on refrigerators?
- By the way how do refrigerators and air conditioners work?
- Why can't I cool my room by keeping the refrigerator door opened?
- Why is it a bad idea to plug my TV, stereo, computer, radio and hair dryer into the same outlet?

- How do they take my temperature by sticking that gadget into my ear?
- Why does the cue ball stop dead when it hits another ball head on?
- What is a day, month, year?
- Why does a year on Jupiter last 12 years?
- Are hydrogen fuel cells or hybrid cars the answer to the energy crisis?
- What does it take to make an atom bomb?

- Where does electricity come from?
- Why doesn't the electricity leak out of the outlet?
- What do airplanes and curveballs have in common?
- Why do my ears pop when I'm on a plane?
- Why can I see all of myself in a mirror that is half as tall as I am?
- what is the Greenhouse effect?
- what's the deal with the ozone layer?
- Is climate change for real? Are we causing it?

What Physics isn't

- Art
- Philosophy
- Engineering
- Religion
- Math
- Astrology
- Magic
- Boring and impossible to understand
- Done only by mad scientists

- How do(es) x-rays, microwaves, ultrasound, MRI's, LASERS, and cable TV work.?
- By the way how does TV work?
- Why does the water in my tub spin in a circle as it goes down the drain? Why does it always spin in the same direction?
- How does soap work?
- Why is the sky blue during the day but red at sunset?
- Are nuclear power plants safe?

THANK YOU

Sir,

Subject: Thank you and Appreciation- Reg.

I am enlightened to take this opportunity to congratulate Naipunya Club of your college for giving wonderful session on "General interaction on Applications of Physics in Engineering" on 1-9-2018. With this session, our students understood the basics of Physics in and its applications in Engineering. It has given exposure to Physics and its applications. We hope this collaboration will continue in future.

Thanking you

Respected sir,

Subject: Permission for organizing Skill Development Program on CNC Turning Machine –
Reg.

With reference to the discussion held with the sarpanches of nearby villages, Naipunya Club is planning to organize Skill Development Program on CNC Turning Machine to the unemployed youth of nearby five villages from 13-10-2018 to 15-10-2018 in our campus. The main objective of this training is to focus on training the unemployed people towards increase in their chance of employment.

Resource person for this training is Mr. D. Ajay, Associate Professor in the department of Mechanical Engineering.

Kindly accept the proposal and provide the resources to access the lab and machinery.

The Schedule is enclosed.

Overview of Numerical Control

A new technique for controlling the machine / production tools, the Numerical Control (NC) was developed in mid 50's. Prior to this, all the machine / production tools were manually operated and controlled. Quality of the products produced by manually operated machines is totally dependent on the skills and mind status of the human operator. Numerical control machines are more accurate than manually operated machines, can produce components more uniformly, faster and in the long-run tooling costs are smaller but the initial investment is higher.

Numerical Control (NC) has been defined by the Electronic industries Association (EIA) as 'a system in which actions are controlled by direct insertion of numerical data at some point'. This system automatically interprets symbolic instructions (numerical data) to control machine tools and other manufacturing systems. Symbolic instructions or the numerical data required to produce a part is called a 'part program'.

Traditionally, in "the NC machining, part drawing of the component to be machined is studied by the NC programmer who translates the information on the drawing to the necessary programme which issues operational instructions to the machine tools. The programme represents the path or action at every moment that the machine tool must take to properly machine the part as described by the engineering drawing.

In the initial stages of NC development the programmed instructions stored on punched tapes were interpreted by electromechanical tape readers connected to the machine tool. The main problem with tapes was that it was very difficult to change the instructions on the tape. Even to make very minor instructions in the programme, new tape had to be made in addition to interrupting machining. Operations. Another draw-back of using the tapes was that they had to be run as many times as the number of components required, which decreased the life of tape.

With rapid developments in computer technology and its capabilities, the problems associated with punched paper/plastic tape were solved. Rapid development in computer technology extended numerical control (NC) to direct numerical control (dNC), computer numerical control (CNC) and distributed numerical control (DNC).

Fig. 15.13 Direct numerical control.

Fig. 15.14 Distributed numerical control.

The problems faced by NC lead to the development of a concept known as direct numerical control (dNC) which eliminates the use of tape as a medium of carrying the programmed instructions. In dNC many machine tools are connected to a host computer through a data transmission link as shown in Fig. 15.13. Here, the NC programmes required to operate the machines are stored in the host computer and are fed to the machine tool connected through the data transmission lines. Even though dNC eliminates the use of tape, it will suffer whenever the host computer goes down. This shortfall of dNC led to the development of computer numerical control (CNC) which allowed NC machines at remote locations to be connected to the host computer.

Distributed numerical control (Fig. 15.14) was developed by combining the positive point of both direct numerical control (dNC) and computer numerical control (CNC). Hence, in distributed numerical control (DNC) both host and local computers are present at individual machine tool. Here host computers are used as main storage devices and programmes are downloaded to the mini-computers present at various machines where they are stored or transmitted to the NC machines. Mini-computer controllers also serve as back-up memory whenever the host computer is down. Therefore, the NC machines do not have to be down when the host computer is down. An effective data transmission network from the host computer to the micro-computer controls the NC machines and is key to the success of distributed numerical control systems. In rest of this book, NC is used as synonym for CNC. Various components present in NC machine tool are:

- . Machine tool
- . Machine Control Unit (MCU)
- . Communication interface and accessories

The machine tool may be any type of machine tool used in the manufacturing industry. Machine control unit (MCU) is the control unit that reads and interprets the numerical data/part programmed from the tap or any other media and passes on this information in the form of electrical signals to various activators / drive mechanisms of the machine to operate the machine tool in the desired way.

NC PART PROGRAMMING

Coordinate Systems

In an NC system, each axis of motion is equipped with a separate driving source that replaces the hand wheel of the conventional machine. The driving source can be a DC motor, a stepping motor, or a hydraulic actuator. The source selected is determined mainly based on the precision requirements of the machine, as described in Chapter 9.

The relative movement between tools and workpieces is achieved by the motion of the machine tool slides. The three main axes of motion are referred to as the X, Y, and Z axes. The Z axis is perpendicular to both the X and Y axes in order to create a right-hand coordinate system, as shown in Figure 10.1. A positive Motion in the Z direction moves the cutting tool away from the workpiece. This is detailed as follows:

Z AXIS

1. On a workpiece -rotating machine, such as a lathe, the Z axis is parallel In the spindle, and the positive Motion moves the tool away from the workpiece (figure 10.2).
2. On a tool-rotating machine, such as a milling or boring machine, the Z axis is parallel to the tool axis, and the positive motion moves the tool away from the workpiece (Figures 10.3 and 10.4).
3. On other machines, such as a press, a planing machine, or shearing machine, the Z axis is perpendicular to the tool set, and the positive motion increases the distance between the tool and the workpiece.

X AXIS

1. On a lathe, the X axis is the direction of tool movement, and the positive motion moves the tool away from the workpiece
2. On a horizontal milling machine, the X axis is parallel to the table.
3. On a vertical milling machine, the positive X axis points to the right when the prorammer is facing the machine.

The Y axis is the axis left in a standard Cartesian coordinate system.

NC Program Storage Media

Modern CNC controllers provide several ways of transferring data. Perhaps the most typical data-communication methods used to transfer part program files is an RS-232C interface (see Chapter 8). An NC part program is stored in a file on a computer or a CNC controller. The file download (or upload) can be initiated by setting up a transfer mode on the CNC controller. On the other side of the communication cable is a computer that sends or receives data byte by byte. The operator must start and end the data-transfer process on both the CNC controller and the computer. Some machines use higher-level protocols to ensure an error-free data transfer. Two of the higher-level protocols used are Kermit and Xmodem. Kermit and Xmodem are widely accepted in the computer-to-computer telecommunication file-transfer process. These protocols allow the file transfer to be controlled by either the computer or the controller. The computer can send and retrieve data directly.

Some machines also provide local-area network (LAN) instead of serial communication. Ethernet and MAP are two technologies used. Some CNC controllers allow the entire controller function to be initiated from a remote computer through the data-communication network.

Report on
Skill Development Program on CNC Turning Machine
Under
UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM

Date: 13-10-2018 to 15-10-2018,

Time: 9 am to 4.00 pm

Venue: CMR College of Engineering & Technology

Event report:

IQAC have organized a unemployed youth skill development program on Lathe Machine to the unemployed youth of nearby five villages. The main objective of this training is to focus on training the unemployed people towards increase in their chance of employment.

In these three days the trainees are explained by Lathe machine introduction, Types of Lathe machines, Mechanisms of Lathe machines, Applications of lathe machines.

We explained about Computer Numerical Control, Absolute coordinate system, Incremental coordinate system, G-Codes, M-Codes.

At the time of visit to the lab we explained the practical parts of lathe machines and the mechanisms were shown to them.

Then we showed how to work on lathe machines with safety precautions. They were given by designs of work to be turned and under the guidance of lab assistants the operations were conducted.

No. of Participants attended the session: 9

Venue: CAPD/CAD/CAM Lab, CMRCET

Overall Feedback: As per discussion with the people involved in the session, the topic covered was appreciated by most of the participants and requested to arrange such hands on with advancements in the future also.

Outcome: Participants are in a situation to estimate the working methods on lathe and appropriate techniques for better utilization of Machine.

CONTENTS FOR GUEST LECTURE ON INTRODUCTION TO MS-Excel

INTRODUCTION:

Microsoft Excel is a spreadsheet developed by Microsoft for Windows, macOS, Android and iOS. It features calculation, graphing tools, pivot tables, and a macro programming language called Visual Basic for Applications. It has been a very widely applied spreadsheet for these platforms, especially since version 5 in 1993, and it has replaced Lotus 1-2-3 as the industry standard for spreadsheets. Excel forms part of the Microsoft Office suite of software. It can display data as line graphs, histograms and charts, and with a very limited three-dimensional graphical display. It allows sectioning of data to view its dependencies on various factors for different perspectives. It has a programming aspect, *Visual Basic for Applications*, allowing the user to employ a wide variety of numerical methods, for example, for solving differential equations of mathematical physics, and then reporting the results back to the spreadsheet.

AIMS

This MS-Excel training course aims to provide the essentials skills needed to create, edit formatting cells and worksheets preparations.

COURSE OUTCOMES:

By the end of this course, you should be able to:

- Indicate the names and functions of the Excel interface components.
- Enter and edit data.
- Format data and cells.
- Construct formulas, including the use of built-in functions, and relative and absolute references.
- Create and modify charts.
- Preview and print worksheets.
- Use the Excel online Help feature.

Subject: Thank you and Appreciation-- Reg.

On behalf of UPS, Yellampet, I am thankful to CMR College of Engineering & Technology for conducting a session on "Breifing session Introduction to MS - Excel" on 5-1-2019. The guest talk was very informative to our students in understanding the concepts of MS- Excel. I request Naipunya Club of your college to conduct more events in coming days.

Respected sir,

Subject: Approval for organizing a 3-day training program on Welding for unemployed youth of nearby villages – Reg.

With reference to the telephonic conversation held with Pudur Sarpanch, NAIPUNYA Club is planning to organize a “3-day training program on Welding” for unemployed youth of nearby villages from 19-01-2019 to 21-01-2019 at CMR College of Engineering & Technology. The objective of this training is to develop the skill set on welding and encourage towards self employment or work position in any industry.

Resource person for this training is Mr. E. Sammaiah, Assistant Professor, Mechanical Engineering, CMRCET. To organize this training program, resources of Engineering Workshop Lab are required. Materials and tools required are attached herewith.

I request you to kindly accept the proposal and provide the resources.

COURSE OUTCOME

1. Carry out routine jobs of setting the machine and components for cutting, welding, brazing and allied operations.
2. Perform practical skills to cut/ weld metal pieces in different positions by using, Gas welding, with appropriate equipments/ consumables and ensure quality weld joints.
3. Perform manual Gas cutting operation for carrying out repair works or stock removal.
4. Perform joining of metals by brazing process to the required quality.
5. Perform practical skills to prepare and weld metal pieces in different positions by using Arc welding, with appropriate equipments/ consumables and ensure quality weld joints.
6. Perform inspection of welded joint by visual inspection, and measure weld parameters using weld gauges.

Program Schedule:

Day 1: 19-1-2019

Forenoon: 9:30 AM to 12:30 AM

1. Introduction to Welding (వెల్డింగ్ పరిచయం)
2. Safety in welding (వెల్డింగ్ భద్రత)

Lunch: 12:30 PM to 1:30 PM

After noon: 1:30 PM to 4:00 PM

1. Quick guides to processes (ప్రక్రియలకు శీఘ్ర మార్గదర్శకాలు)
2. Metal identification (మెటల్ గుర్తింపు)
3. Unalloyed / low alloyed steel (పని చేయని / తక్కువ మిశ్రమ ఉక్కు)
4. Copper and copper alloys (రాగి మరియు రాగి మిశ్రమాలు)
5. Evaluation of welds (వెల్డ్స్ యొక్క మూల్యాంకనం)

Day 2: 20-01-2019

Forenoon: 9:30 AM to 12:30 AM

1. Arc Welding Process (ఆర్క్ వెల్డింగ్ ప్రక్రియ)

Lunch: 12:30 PM to 1:30 PM

After noon: 1:30 PM to 4:00 PM

1. Hands on session on arc welding (ఆర్క్ వెల్డింగ్ ఆచరణాత్మక)

Day 3: 21-01-2019

Forenoon: 9:30 AM to 12:30 AM

1. Gas welding process (గ్యాస్ వెల్డింగ్ ప్రక్రియ)

Skill Development Program on Welding
Under
UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM**

Date: 19-01-2019 to 21-01-2019,

Time: 9:30 am to 4.00 pm

Venue: CMR College of Engineering & Technology

Event report:

NIPUNYA Club has organized a unemployed youth skill development program on welding to the unemployed youth of nearby five villages. The objective of this training is to focus on training the unemployed people towards increase in their chance of employment.

In these three days the trainees are explained by Arc Welding Process & Equipment, Gas Welding and Cutting Process & Equipment and safety measures.

At the time of visit to the lab we explained the practical parts of welding machines and the mechanisms were shown to them.

Then we showed how to work on welding machines with safety precautions. They were given by designs of work to be turned and under the guidance of lab assistants the operations were conducted.

No. of Participants attended the session: 09

Venue: Engineering Workshop, CMRCET

Outcome: Perform practical skills to cut/ weld metal pieces in different positions by using. Arc,

Gas welding.

Overall Feedback: As per discussion and feedback with the people involved in the session, the topic covered was appreciated by most of the participants and requested to arrange such hands on with advancements in the future also.

Respected sir,

Subject: Approval for organizing a 3-day training program on Welding for unemployed youth of nearby villages – Reg.

With reference to the telephonic conversation held with Pudur and Raja Bollaram Sarpanch, NAIPUNYA Club is planning to organize a “3-day training program on Milling” for unemployed youth of nearby villages from 16-02-2019 to 18-02-2019 at CMR College of Engineering & Technology. The objective of this training is to develop the skill set on welding and encourage towards self employment or work position in any industry.

The proposed resource person for this training is Mr. D. Ajay, Associate Professor, Mechanical Engineering, CMRCET. To organize this training program, resources of **Engineering Workshop Lab** are required. Materials and tools required are attached herewith.

I request you to kindly accept the proposal and provide the resources.

Skill Development Program on Milling
Under
UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM
Date: 16-02-2019 to 18-02-2019

CONTENT

1. Milling Introduction
2. Types of Milling Machine .
 - 2.1 Horizontal Milling Machine
 - 2.2 Vertical Milling Machine
3. Cutting Tools
 - 3.1 Cutting Tools for Horizontal Milling Machine
 - 3.2 Cutting Tools for Vertical Milling Machine
4. Industrial Applications
5. Milling Processes
 - 5.1 Spindle Speed
 - 5.2 Feed Rate
 - 5.3 Depth of Cut
 - 5.4 Direction of Cutter Rotation
6. Typical Milling Operations
 - 6.1 Plain Milling
 - 6.2 End Milling
 - 6.3 Gang Milling
 - 6.4 Straddle Milling
7. Milling Set Up
 - 7.1 Vice Alignment
 - 7.2 Work Holding Method
8. Safety

COURSE OUTCOME

1. Carry out routine jobs of setting the machine and components for milling
2. Perform practical skills to milling in different positions by using, milling machine.
3. Perform manual Plain Milling, End Milling, Gang Milling, and Straddle Milling
4. Perform milling of gears and others equipments...
5. Know about industrial applications of milling.

UNEMPLOYED YOUTH SKILL DEVELOPMENT PROGRAM
Date: 16-02-2019 to 18-02-2019

Time: 9:30 am to 4.00 pm
Venue: CMR College of Engineering & Technology

Event report:

IQAC have organized a unemployed youth skill development program on welding to the unemployed youth of nearby five villages. The main objective of this training is to focus on training the unemployed people towards increase in their chance of employment.

In these three days the trainees are explained by Types of Milling Machine, Cutting Tools, Industrial Applications, Milling Processes, Typical Milling Operations, Milling Set Up and Safety

Then we showed how to work on milling machine with safety precautions. They were given by designs of work to be turned and under the guidance of lab assistants the operations were conducted.

No. of Participants attended the session: 08

Venue: Engineering Workshop, CMRCET

Overall Feedback: As per discussion with the people involved in the session, the topic covered was appreciated by most of the participants and requested to arrange such hands on with advancements in the future also.

Outcome: Perform practical skills to milling in different positions by using, milling machine.

A Report on 3-day training session on soldering Under NAIPUNYA Club

The Department of ECE, CMR College of Engineering & Technology organized a NIPUNYA Club is planning to organize a "3-day training session on soldering" for unemployed youth of nearby villages from 16-3-2019 to 18-3-2019 at CMR College of Engineering & Technology. The main objective of this training programme is to develop the skill set on soldering to repair of electronic equipment for self employment or work position in any industry. Resource person for this training is **Mr. M.Vedachary**, Assoc Professor, ECE Dept.

Contents of Lecture

- Different than welding
- More like brazing
- Solder: conducts, low melting temperature
- Iron: heats up, melts solder
- Joins wires, PCBs, electronic components
- Quickly: Soldering in the Dojo
- Review the tools needed to solder and de-solder electronic components.
- Demonstrate how to *tin* a soldering iron tip.
- Demonstrate the soldering process.
- Show the characteristics of a good solder connection.
- Review classic soldering mistakes.
- Demonstrate the de-soldering process

Author Profile

Manchoju Vedachary
Assoc Professor
Qualification:M.tech
ECE Dept.

Course outcomes:

By the end of this course students should be able to:

1. Identification of resister values, identification of electrical components.
2. Repairing of electronic components.
