## 2. Role of Women in Nation Building

Date: 27.01.2015

Nation building, as we can understand from the postcolonial experiences of Asian and African countries, is a difficult process as it has to deal with repercussions of coming into existence of nation. Women have played a huge role in this process in the form of providing leadership. During Indian Freedom Struggle women leaders like Aruna Asaf Ali, Lakshmi Sehgal, Suchetra Kriplani, Usha Mehta and numerous others played an active part in their fight against the British rule. During the time of freedom women leaders actively pursued the cause of women even as they are fighting the foreign rule. The struggle for equal representation of women in legislatures and other public institutions continued in the post independence era. They succeeded partially in achieving representation for women in local legislative institutions like Panchayat Raj. But India and many other developing nations have long way to go in giving equal representation and opportunities for women in public life. They are still under represented in law making institutions like parliament. Their participation in economically productive work is abysmally low. As a consequence their voices are not heard and women forgo their right to participate in nation building. In order to discuss the issues concern women and their role nation building CMR CET organized a one day seminar on "Role of Women in Nation Building." Prof. S. Fatima Mary from the English Department conducted the one day Seminar. And this Program was organized by the **Student Counseling Centre** in collaboration with **Women Empowerment Committee** with an aim to make girls and women aware of their strengths to fight for their basic rights.
