Sir,

Through: **IQAC** coordinator

Sub: Request for permission to screen films on **Gender Sensitization** Regarding.

The **Women Protection Centre** and the **Student Counseling Centre** of CMR College of Engineering & Technology would like permission to conduct a workshop where films on **Gender Sensitization** will be screened for all the first year students in H & S Seminar Hall on 9th August 2017, between 1pm and 4pm.

The **aim** in showing these films to the students is to make them sensitize towards gender equality.

Yours Sincerely

Ms. S. Fatima Mary

2. Love and acid do not mix: An interactive session on Acid attacks

19.09.2017

Group Discussions on the topic Acid Attacks

1/1/19

Acid Attacks

Acid attacks often occur as revenge against a woman who rejects a proposal of marriage or a sexual advance. Gender inequality and women's position in the society in relation to men, plays a significant role in these types of attacks.

Acid throwing, also called an acid, a vitriol attack or vitriolage, is a form of violent assault defined as "the act of throwing acid or a similarly corrosive substance onto the body of another" with the intention to disfigure, maim, torture or kill. Perpetrators of these attacks throw corrosive liquids at their victims, usually at their faces, burning them and damaging skin tissue, often exposing and sometimes dissolving the bones.

The most common types of acid used in these attacks are sulfuric and nitric acid. Hydrochloric acid is sometimes used, but is much less damaging.

The Women Protection Cell and the Student Counseling Centre of the CMRCET conducted the above event with an aim to enlighten the students about how and why the male aggression makes the female a victim.

Report on:

3. Cyber Crime Awareness for secure life of Girls

02.11.2017

Spreading awareness about crime is as important as investigating crime. Educating citizens, especially women, about crime perhaps would go a long way in protecting them from crime. The act of spreading awareness is more important as the nature of crime has changed due to information technology which has become part of everyday life. Information technology in the form of smart phones and social media and networks pose special risk to women and children as it makes it relatively easy for the men to target them. The crime takes the form of stalking and harassing women and children either by direct means or by posting their details in dark web or such harmful places in cyber world. It becomes very difficult to deal with the repercussions of such activities as it harms one's self image and reputation among the public. **CSE Department and the Student Counseling Cell** of CMRCET conducted an event on Cyber crime awareness to educate students about the precautions they have to take when they share their details such as phone number and other personal information with anyone. It is because many times the culprit turned out to be a person who is well known to the victim. A senior faculty of the CSE Department Dr. KLS Sowjanya conducted the event. Thus by sharing examples and experiences of victims of cyber crime our **aim** is to educate and protect our women and children better.

"BETTER BE SAFE THEN SORRY!"

There are five major types of cyber-crime that are increasing rapidly, including: identity theft, online fraud, ransomware attacks, data theft, and denial of service (DDoS) attacks. These are all serious threats to individuals and organizations alike. To protect yourself from the cyber-criminal, it is important to take several steps:

- (i) Use a full-disk encryption software to protect your data.
- (ii) Use strong passwords.
- (iii) Keep your software updated.
- (iv) Manage how you share sensitive information.
- (v) Take measures to help protect yourself against identity theft and etc...

Cyber-crime is a crime that involves a computer or a network. The computer may have been used in the commission of a crime, or it may be the target. Cyber-crimes can be defined as: "offences that are committed against individuals or groups of individuals with a criminal motive to interfere with the reputation of the victim directly or indirectly, using modern communication technologies such as internet (including chat rooms, email, social media and groups) and mobile phones."

CYBER CRIME

Shweta

Definition of Cyber Crime

Cybercrime is a crime that involves a computer and network. Cybercrimes can be defined as: "Offences that are committed against individuals or groups of individuals with a criminal motive to intentionally harm the reputation of the victim. Directly or indirectly using modern telecommunication networks such as Internet.

Cybercrimes crossing international borders and involving the actions of at least one nation-state is sometimes referred to as Cyberwarfare.

Classifications of Cyber Crime

- * Financial Fraud Crimes
- * Cyberterrorism
- * Cyberextortion
- * Cyberwarfare
- * Drug trafficking

A primary impact from Cybercrime is financial, and Cybercrime can include many different types of profit-driven criminal activity.

Report on:

4. Nirbhaya Laws: A Caution for both Genders

21.02.2018

Violence against women in general and sexual violence against them in particular in India is old as the history of myth that is woven into the fabric of the nation. It had appeared as if these crimes against women are a normative aspect of general nature of crime. But Nirbhaya incident (2012) in Delhi forced the government of India to take a serious view of crimes against women. It attracted international attention due to massive protests across the country against such barbaric and heinous acts against women. The government of India appointed Justice J.S.Verma to suggest amendments to criminal law to deal with the new waves of crime against women . Thus The Criminal Law (Amendment) Act, 2013 (Nirbhaya Act) came into force. This is followed by many other changes in the criminal justice system. Fast track courts to deal with the criminal acts against women were formed. Harsher punishments to culprits are being given. Marital rape is now being treated as a crime. The government made amendments to the juvenile justice act in view of the involvement of the juveniles in many criminal acts. Such juveniles are now treated as adults keeping in view of the nature of crime.

The **aim** in conducting the event is to create awareness among the youth and also to spread the lessons learnt from Nirbhaya incident. So CMRCET held a one day meet on Nirbhaya Laws on 21st February 2018. The session was conducted by Ms. Rosy Matilda Asst. Prof. of the English Department. It was jointly organized by the **Women Protection Cell** and the **Student Counseling Cell**.
